FINISH:
Interior and exterior doors, trim, stair parts, windows and fixture components are available raw (unfinished), painted or stained (prefinished). Standard stain colors are nutmeg, natural, wheat, cordovan cherry, diamond light oak, fruitwood, pecan, honey, cider, toffee or cinnamon. Standard paint colors are white, navajo, almond, eggshell, marshmallow or overcast.

All prefinished orders will be processed on a per order basis. (Allow **12** working days for delivery.)

NOTE: Custom color samples will be shipped for color verification. The color approval sheet (sent with the sample in a 'Property of Badger' plastic bag) must be signed and received at Badger's millwork office before product goes into production/finishing. This may alter your delivery date.

STANDARD HARDWARE:
Hollow core prehung doors include 3 standard plain bearing hinges with a #4 bright finish and hinge pin (coated). 1-3/8" thick doors have 3-1/2" x 3-1/2" x 5/8" radius hinges. 1-3/4" doors have 4" x 4" x 5/8 radius hinges. Standard hinges for solid core, stile & rail, and lited doors are ball bearing #4 bright finish. Optional hinge styles and finishes are available and can be found in the millwork hardware section.

Doors are bored with a standard 2-1/8" face bore, 1" edge bore and 2-3/4" backset for drive-in latch bolt.
2-3/8" backset and edge mortises are optional. Locksets are not included.

JAMBS:
Standard jambs are veneered wrapped, 11/16" thick. Jamb height is 6'9" from underside of head dado to bottom. All species and widths are available in veneered, solid, lumber core, and MDF styles.

PALLET CHARGES:
Doors and moulding are normally shipped on returnable pallets. Credit for the steel door pallets ($225.00 Net) and the steel moulding pallets ($500.00 Net) will be issued when the pallets are returned.
A disposable (non-returnable) pallet carries a $20.00 Net charge.

NON-STOCK SPECIAL ORDERS:
All special orders will be quoted and a fax acknowledgment will be sent for approval. To provide accurate pricing and quality service, we require 24 hours for all special order quotes.

Prices and specifications are subject to change without notice.

RETURN, CANCELLATION, & CHANGE POLICY

CHANGES & CANCELLATIONS:
Raw/unfinished orders cannot be changed or cancelled after 24 hours of receipt of acknowledgement.
Prefinished millwork orders cannot be changed or cancelled after 48 hours.

RETURNS: All returns are subject to inspection. Returned goods will not be accepted after 30 days of the original invoice date, or if the product has been "Badger Discontinued" or "Factory Discontinued". We reserve the right to refuse the return on any item that is not a regular stock item with us. All items must be returned in their original carton, and be in **good saleable condition**.

Return Procedure: Customers may call customer service to schedule a pick up for returned material. Once approved, a Return Material Authorization (RMA) will be issued for our driver to pick up and return the material. Drivers are not allowed to return material without an RMA.

Special order products are not returnable.
Special orders can only be changed, cancelled or returned if approved by the original manufacturer and the customer agrees to pay all restocking charges. No modification to or cancellation of shop-built items will be accepted after the manufacture of such items has begun.

Prefinished Materials:
--- All prefinished materials (doors, trim, stair parts, etc.) are not returnable.

DOORS (Raw/unfinished stock doors only)

PREFINISHING CHARGES - CUSTOMER SUPPLIED MATERIAL

Customer supplied material, prefinished at Badger, will be billed at a **60% upcharge** to the listed prices, **plus handling and freight charges** if picked up by a Badger truck or for job site deliveries. (See details below.)

PREFINISHING CHARGES:

All prefinished orders will be processed on a per order basis.
(Allow 15 working days for delivery.)

! ! ! IMPORTANT: The color approval sheet must be signed and received at Badger's millwork office before product goes into production/finishing.

GLAZING / ARTISAN COLORS: *(20 working days required for delivery)*

DARK COLORS (heavily pigmented):

require a dye stain base with pigmented overlays and tinted top coat.
Allow an additional **8** days for delivery (20 working days).

Standard Handling Charge: A standard handling charge of ***$195.51*** (IDLHC-IB) will be added to the order. This covers the time & labor to unload, un-package and sort the material before pre-finishing preparations can begin.

Delivery to Badger: Prices are based on material being delivered to Badger by the customer. A fee will be charged if material is to be picked up by a Badger truck. This upcharge will vary based on product and quantities being returned. Call our Millwork office for quote. ***(1-877-234-9756)***

Packaging Conditions:

To prevent damage in transit, material should be prepared as follows:

> Doors should be diaper wrapped and in cardboard with top, bottom & corners protected.

> Interior Molding should be packaged face to face & shrink wrapped

> Wood Stair parts must be wrapped in cardboard & shrink wrapped if original shipping carton is not available.

> Fluids: Must have original label and to prevent spillage liquid containers must be sealed tight with can clips.

Return Delivery Charge:

Additional freight charges may apply for job site deliveries.

Timeless Finishes by Badger

We'll Finish It… *Exterior or Interior…* Start to Finish, every aspect is performed "In-House" at Badger Corrugating. With unlimited matching capabilities and finishing options, we can offer paint glazing, stain glazing, artisan finishing and distressing. Perfect for remodel, fire restoration and general restoration projects. From windows, shutters, clad frames, aluminum siding and storm doors to steel sheets, XO board, soffit & fascia, virtually anything is possible.

Badger Corrugating offers a prefinishing option for Steel and Fiberglass doors and sidelites. All stock and special order doors and sidelites may be ordered prefinished. They will be spray painted or stained in our professional finishing booth, and then may be installed in a wood or clad jamb.

Badger's finish combines polyester resins for toughness, and acrylic resins for long-term weathering and film flexibility.

When placing an order for prefinished doors and sidelites, allow an additional two (2) week lead time. Custom colors may take one (1) week longer. No up-charge for custom colors (stain or paint).

SCHLAGE LOCKSETS

A-Series Residential and Commercial. Cylindrical key-in-the-knob locks, the "A" series is ideal for heavy duty residential or medium duty commercial uses.

AL-Series Standard Duty Commercial: The AL-Series keyed lever lock utilizes the A-Series cylindrical chassis with stylish lever designs supported by heavy duty spring cages. This design provides strength and performance in commercial Grade 2 applications.

B-Series Security Deadbolt: B-Series deadbolt locks provide primary or auxiliary security locking. All deadbolts feature a 1" (25mm) throw with Schlage's exclusive door frame reinforcer to help prevent "kick-in" attack.

F-Series Residential: The F-Series economical residential Line consists of grip handles with 1" (25mm) throw deadbolts, key-in-the-knob entry locks and matching interior latchsets. They are mechanically long lasting and fill the need for moderate to low cost locks without sacrificing quality.

HOW TO ORDER:

To order Schlage products, descriptive data should be in the same sequence as shown.

DOOR HANDING

All Schlage locks are reversible. However, the correct hand should be shown for all pin tumbler locks so that they may be assembled to assure keyholes are in the upright position.

Hand information is also necessary to ensure proper finish of latchbolt and strike for locks ordered that are to be installed on reverse bevel doors.

Follow the diagram to correctly determine the hand of the door.

Residential Electronics

Ships pre-programmed with random 6 digit programming code and 2 random 4 digit user codes. 19 user code capacity.

Fits standard 2 1/8" door prep. No other holes needed. Installs with just a screwdriver.

Mechanical key override which can be re-keyed to match existing house key.

Blue LED's illuminate the keypad on demand. Keypad numbers are imbedded into the silicone rubber, creating wear resistant buttons.

Warning code sounds after 4 incorrect codes entered and lock disables for 30 seconds.

9-volt alkaline battery included. 3 year average life. Low battery indicator.

Field reversible levers (where applicable). Locks available in both Plymouth and Camelot escutcheon designs.

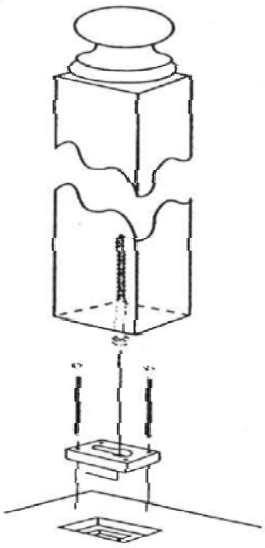
INSTALLATION INSTRUCTIONS

--- Newel Post & Rail Fasteners ---

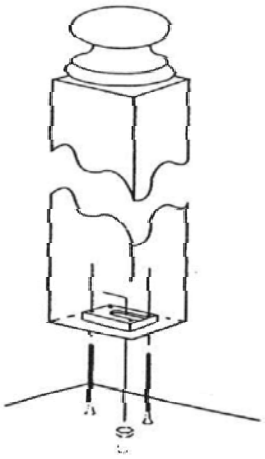
KeyLOCK™

(Prod. # ST1-1122 - Mfg. No. 6283)

Use on finished floor surfaces, stairs, ceramic tile and concrete.



1. **Newel Post Location:** Place newel post in desired location where adequate backing is available. Draw a line around base of post. Set KeyLOCK plate in center of drawing and mark plate for inletting.
   New Construction: To provide adequate bracing on a stair tread, install 2x6's between stair jacks and finish as usual.
   Remodeling: If adequate backing is not available, inlet plate in bottom of newel post and insert lag bolt in stair stringer.
2. **Install Plate:** Inlet plate 1/16" below finished surface (stair tread, nosing, etc.) with a router or chisel. Chisel out keyhole hole area 1/4" to 3/8" deeper and wide enough for lag bolt head to slide freely. Insert plate and fasten with four screws. If surface is cupped or warped, belt sand to provide a flat surface.
3. **Install Lag Bolt:** Cut newel post to desired length. Plumb the post by cutting the post base at angle to accomodate un-level surface. Drill a 1/4" or 5/16" pilot hole by 4" deep in the bottom center of post. With a 9/16" wrench, screw lag bolt into post to within 1/2" of lag bolt head. Wax lag threads for ease of installation. **Optional:** Lag bolt may be installed up to 1/2" off center in bottom of newel post.

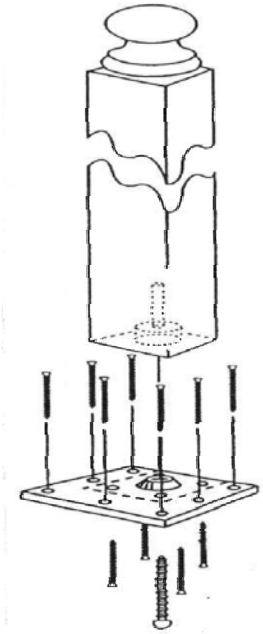


4. **Install Newel Post:** Insert lag bolt head into KeyLOCK plate. With a hammer and block of wood (to protect post) drive base of newel post towards opposite end. As the lag bolt slides down the tapered slot, the post will tighten. If the KeyLOCK plate shows on either side, the lag bolt needs to be loosened or tightened to conceal the KeyLOCK plate.
5. **Ceramic Tile Installation:** Inlet plate in bottom of newel post and screw lag bolt into the floor following the above directions. **Important** - Before drilling 1/4" pilot hole in floor for the lag bolt, drill a 1/2" diameter clearance hole through ceramic tile.
   Concrete Installation: Inlet plate in bottom of newel post by following the above directions.
   Optional: A 3/8" concrete anchor may be substituted for lag bolt in concrete.
6. **Other Uses:** Use the KeyLOCK fastener for securely joining surfaces when a strong, flush or removable installation is needed, ie; Mantels, railings, mailboxes, cabinets, signs, furniture, walls etc.

TOOLS NEEDED: Electric drill with 1/4" or 5/16" and 1/8" or 3/16" wood drill bits. Wood chisel or router, hammer and phillips screwdriver.

INSTALLATION INSTRUCTIONS

--- Newel Post & Rail Fasteners ---



SurfaceLOCK™

(Prod. # ST1-1133 - Mfg. No. 6285)

The SurfaceLOCK newel post fastener is quick and easy to install.
Optional center screw for extra strength.

1. **Mount Plate On Newel Post:** Drill 1" diameter hole by 1/4" deep in bottom center of newel post. Position plate on bottom of newel post. Drill four 1/16" pilot holes, fasten plate to newel post with screws. Wax screw threads for ease of installation.

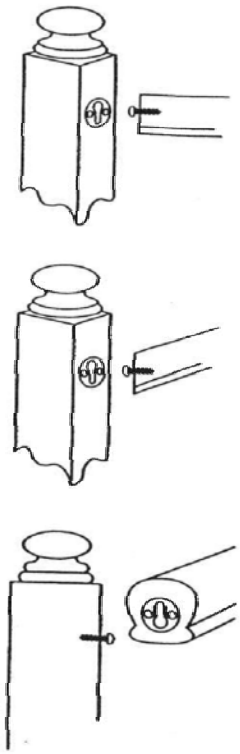
   Optional Center Screw: Recommended for extra strength. In center of 1" hole, drill pilot hole 1/16" by 2" deep. Insert screw through recess in plate and fasten to newel post.

2. **Newel Post Location:** Position plate, mounted on newel post, at desired location. Fasten to surface with 7 screws. To plumb, place shims as needed under plate.

   Newel post location requires adequate backing to fasten screws. Additional holes may be drilled in place for universal applications.

3. **Conceal Metal Plate:** Install carpet or floor covering.

TOOLS NEEDED: Electric drill with 1/16" and 1" wood drill bits, and phillips screwdriver.



MiniLOCK™

(Prod. # ST1-1136 - Mfg. No. 6287)

The MiniLOCK for rail-to-post attachment is fully concealable.

1. **Install MiniLOCK Plate:** Inlet plate 1/16" below the surface. In center end of handrail or post drill a 1-1/4" diameter hole by approximately 3/16" deep. In center of 1-1/4" diameter hole drill a 5/8" hole by approximately 3/16" deep to allow screw head to slide down the tapered slot. Insert plate and secure with 2 screws.

2. **Install Center Screw:** At proper height and angle on post or handrail, drill a 1/16" pilot hole and thread screw to within approximately 1/4" of screw head.

3. **Attachment:** Insert screw head into MiniLOCK plate and apply downward pressure. As the screw head slides down the tapered slot, the rail will tighten. Use a block of wood (to protect rail) and tap rail with hammer to securely tighten. **Note:** Screw head may need to be adjusted by turning in or out for proper alignment.

TOOLS NEEDED: Electric drill with 1/16", 5/8" and 1-1/4" wood drill bits, phillips screwdriver and hammer.

OTHER USES: Use the MiniLOCK for securely joining surfaces when a flush or removable installation is needed, ie; Mirrors, picture frames, shelves and furniture.

DOOR CARE & HANDLING TIPS

We at Badger believe in producing a product that is built like a piece of furniture and will last a lifetime. To have the look of a finished piece of furniture it has to be prepared and finished properly, so please note the installation and finishing instructions below.

Raw Door Notes:

IMPORTANT NOTE

Do not store or install doors on the jobsite before plaster and concrete work is dry. Excessive moisture or dryness in the air can cause damage to the product. All edges and faces - including the top and bottom - must be finished immediately after installation or the warranty will be voided.

Care and Handling Tips Prior to Installation

- Do not deliver until jobsite is free of dampness caused by plastering, etc.
- Store all doors flat on a level surface in a dry, well ventilated environment. Allow air circulation, but cover doors to keep clean.
- Do not drag doors across each other or across other surfaces. Including belt buckles and rivets on jeans.
- Handle doors with clean gloves.
- Inspect doors upon receipt. Remove handling marks and/or effects of moisture and sunlight exposure by lightly sanding all surfaces with 180 grit sandpaper.
- Remove all dust and foreign matter from door using a damp cloth.
- Acclimate doors to the environment before finishing or installing - usually 36 to 48 hours.
- Never leave raw doors at the installation site for extended time periods.

General Finishing Instructions

- All surfaces must be carefully finish sanded, sanding in the direction of the grain using 180 grit sandpaper.
- Using high quality finishes, tools and natural bristle brushes give superior performance.
- Lightly sand doors between finish coats.
- All finishes should be applied in a warm, dry room with good ventilation over 60°F and ***not*** *in direct sunlight .*
- All surfaces of the door, including the top and bottom, must be finished to seal off moisture. Failure to do so will void the warranty.
- Always follow the Finish Manufacturer's product instructions.

Special Tips

- Stains - allow 24 hours to dry. Water-based stains are not recommended as they can cause some species to turn black in spots and may cause lifting of the veneers.
- Polyurethane - allow to dry between coats.
- In general, semi-gloss and satin finishes do not show flaws in the finish as readily as a gloss finish, and generally provide a warmer feel than a gloss finish.
