GLASS WARRANTIES

TRUTECH

Warranties are prorated and only cover the cost of the glass:

0-5 years 100%

6-8 years 75% (customer pays 25%)

9-10 years 50% (customer pays 50%)

10+ years 30% (customer pays 70%)

MASONITE

Warranties are prorated and only cover the cost of the glass:

0-5 years 100%

*Limited Product Warranty

Details Available at: www.masonite.com

RSL

Commodity Door Glass

*Lifetime Warranty on Frame & Glass.

*Install with screws to inside.

*Do not over tighten (max 18-20 inch/lbs).

*Limited lifetime warranty details available at: www.RSLinc.com/marketing/energy.

*Storm doors can cause heat damage not covered by warranty, venting storm doors are recommended.

*Maintenance-free frame does not require painting or staining. If painting is desired, use primer and paint labeled 'for plastics'. Then use 2 coats of clear polyurethane. Paint thinners or similar chemicals void warranty.

Blinds Between the Glass

*Lifetime Warranty on Frame & Glass.

*Blinds are sealed between safety tempered glass.

*Always transport, store and install with blinds in raised position.

*To tilt blinds, simply slide top operator.

*To raise or lower, tilt the blinds into the open position.

*Do not over tighten (max 18-20 inch/lbs).

*Limited lifetime warranty details available at: www.RSLinc.com/marketing/energy.

*Easy to clean; no dusting!

*Maintenance-free frame does not require painting or staining. If painting is desired, use primer and paint labeled 'for plastics'. Then use 2 coats of clear polyurethane. Paint thinners or similar chemicals void warranty.

Decorative Door Glass

*Lifetime Warranty on Frame & Glass.

*Install with screws to inside.

*Do not over tighten (max 18-20 inch/lbs).

*Interior decorative glass is handcrafted, so bubbles and pattern variations are not defects.

*Limited lifetime warranty details available at: www.RSLinc.com/marketing/energy.

*Storm doors can cause heat damage not covered by warranty, venting storm doors are recommended.

*Maintenance-free frame does not require painting or staining. If painting is desired, use primer and paint labeled 'for plastics'. Then use 2 coats of clear polyurethane. Paint thinners or similar chemicals void warranty.

LIFE-TIME LIMITED WARRANTY FOR DURA-FRAME EXTERIOR DOOR JAMBS, MULL POSTS AND BRICKMOLD

A. Who and What is Covered

This warranty is made only to the original non-consumer purchaser (herein referred to as the "Purchaser") of Dura-Frame Exterior Door Jambs, Mull Posts and Brickmold from G-M Wood Products, Inc., a Michigan corporation, whose address is 531 Clay Street, P.O. Box 266, Newaygo, Michigan 49337 (herein referred to as the "Manufacturer"). This warranty is not transferable. This warranty is restricted to Dura-Frame Exterior Door Jambs, Mull Posts and Brickmold that are incorporated by the Purchaser into exterior door frames that are installed in new residential construction in the United States of America in conformity with all applicable local building codes and regulations and that are thereafter properly maintained.

B. What The Manufacturer Will Do

If the Alaskan Yellow Cypress (also known as Alaskan Yellow Cedar) portion (the lower approximate 6 inches) of a Dura-Frame Exterior Door Jamb, Mull Posts or Brickmold covered by this warranty deteriorates due to rot, decay, insect damage or fungus caused by water wicking through the end grain of the door jamb, such that the door jamb, mull post or brickmold is unable to support a sill or hinge, then, subject to the exceptions in Paragraph D, the Manufacturer will furnish to Purchaser a new Dura-Frame Exterior Door Jamb, Mull Post or Brickmold and reimburse the Purchaser up to a maximum of \$250 per door opening for third-party labor costs to install the replacement door jamb(s), mull post(s) or brickmold(s) in the original door frame.

This warranty is limited to one replacement door jamb, mull post or brickmold for each defective original door jamb, mull post or brickmold.

C. Submission of Warranty Claims

To submit a claim under this warranty, the Purchaser must submit written or pictorial evidence supporting Purchaser's claim, including proof of proper installation and maintenance and the extent and cause of covered deterioration. If requested by the Manufacturer, Purchaser must also submit the subject door jamb, mull post or brickmold to the Manufacturer at Manufacturer's closest plant for inspection. Manufacturer's decision on warranty claims is final so long as that decision is in good faith.

D. What This Warranty Does Not Cover

1. This limited warranty stated herein is in lieu of any and all warranties, express or implied (whether written or oral), including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose.
2. Manufacturer shall not be liable for any incidental, consequential, special or contingent damages or expenses, arising, directly or indirectly, from any defect in the Dura-Frame Exterior Door Jamb, Mull Post or Brickmold or the use of the Dura-Frame Exterior Door Jamb, Mull Post or Brickmold.
3. Manufacturer shall not be liable under this warranty and this warranty shall be void and have no effect if the following events occur:
 - a. The Dura-Frame Exterior Door Jamb, Mull Post or Brickmold has been subject to misuse, alteration, neglect or accident.
 - b. The Dura-Frame Exterior Door Jamb, Mull Post or Brickmold has not been installed in accordance with the applicable local building code(s) and/or regulations.
 - c. The Dura-Frame Exterior Door Jamb, Mull Post or Brickmold has been trimmed on the Alaskan Yellow Cypress end.
 - d. The Dura-Frame Exterior Door Jamb, Mull Post or Brickmold has not been painted with a high grade exterior latex paint within 90 days of installation and continuously painted thereafter in accordance with the paint manufacturer's recommendations.
 - e. The Dura-Frame Exterior Door Jamb, Mull Post or Brickmold is removed from its original installation location.
 - f. The Dura-Frame Exterior Door Jamb, Mull Post or Brickmold is installed in direct contact with wet cement, soil or other moist materials or has been submerged in water.
4. Manufacturer does not warrant paint adhesion or paint appearance. Manufacturer's only warranty with respect to paint is that the Dura-Frame Exterior Door Jambs, Mull Posts or Brickmold are primed with a latex primer intended for limited exterior exposure at the time of delivery to Purchaser.
5. Except when specifically prohibited by the applicable state law, the Purchaser, and not the Manufacturer, shall be liable for and shall pay for all charges in excess of \$250 per door opening for labor or other expenses incurred in the removal, repair or replacement of the Dura-Frame Exterior Door Jamb, Mull Post or Brickmold claimed to be defective or for any other expense incurred to remedy any defect in the product.

Such charges may include, but are not necessarily limited to:

 - a. All costs necessary or incidental in removing the defective Dura-Frame Exterior Door Jamb, Mull Post or Brickmold and installing a replacement Dura-Frame Exterior Door Jamb, Mull Post or Brickmold.
 - b. Any material required to complete, and/or permits required for, installation of a replacement Dura-Frame Exterior Door Jamb, Mull Post or Brickmold.
 - c. All costs necessary or incidental in returning the defective Dura-Frame Exterior Door Jamb, Mull Post or Brickmold to a location designated by the manufacturer.
6. The terms of this Limited Warranty cannot be modified by any person, whether or not he/she claims to represent or act on behalf of the Manufacturer.

ENERGY STAR®

Receive an Energy Star Rating when you purchase a Masonite Door Slab and Masonite Glass.

ENERGY STAR is a program developed by the U.S Environmental Protection Agency and the U.S. Department of Energy. The goal of the program is to protect the environment and save you money by encouraging energy efficient products, services, and practices. To that end, Masonite is proud to produce a wide variety of door and glass combinations that ensure our products can be used as part of an ENERGY STAR qualified assembled door system.

Masonite doors and sidelites include a premium polyurethane foam core that insulates up to 5 times better than wood. Our triple pane decorative glass with caming creates an excellent insulator against the cold in the winter and the heat of summer. A properly installed ENERGY STAR qualified door system can save you money all year. Our NFRC certified door systems may qualify for the ENERGY STAR program. Although other criteria exist for eligibility, including U-Factor and Solar Heat Gain Coefficients, use the charts below as a general guideline for which Masonite products may qualify.

For further information, see our website at: www.masonite.com.

- Pry Bar
- Measuring Tape
- Safety Glasses

2. ADD REFERENCE MARKS

- 2.1 Determine proper fit and use a pencil to make reference marks between the door and top and side of hinge. *Fig. 1*

Fig. 1

3. LOOSEN HINGE SCREWS

- 3.1 Loosen hinge screws using a Phillips head screwdriver (*do not completely remove screws*).

4. BREAK TEMPORARY BOND

- 4.1 The door is prepped for hinges using factory preset locations that are temporarily bonded in place.
- 4.2 To adjust your door it is necessary to break the temporary bond by using a pry bar at the bottom **hinge side** of the door. Apply force upwards. Use caution to avoid damage to the door sweep. Once the bond is broken the hinge reinforcement plates in the door will move freely. *Fig. 2*

Fig. 2
Factory Preset

Fig. 3
Up Adjustment

Fig. 4
Down Adjustment

Fig. 5
In Adjustment

Fig. 6
Out Adjustment

5. ADJUSTMENT DETAILS

- 5.1 The door can be vertically adjusted 5/8" and 1/8" in or out.

6. UP/DOWN ADJUSTMENTS

- 6.1 To adjust up or down use the pry bar to lift the door to desired height then tighten the screws on all three hinges. *Fig. 3/4*

7. TOP IN/OUT ADJUSTMENTS

- 7.1 For top in/out adjustment, use the pry bar to lift the door to desired height then tighten all screws on the bottom hinge. Adjust door in/out as needed then tighten screws on remaining hinges. *Fig. 5/6*

8. BOTTOM IN/OUT ADJUSTMENTS

- 8.1 For bottom in/out adjustment, use the pry bar to lift the door to desired height then tighten all screws on the top hinge. Adjust door in/out as needed then tighten screws on remaining hinges. *Fig. 5/6*

9. FINAL STEP

- 9.1 When complete, double check that all hinge screws are sufficiently secure.

**Receive an Energy Star Rating when you purchase a
Masonite Door Slab *and* Masonite Glass.**

ENERGY STAR is a program developed by the U.S. Environmental Protection Agency and the U.S. Department of Energy. The goal of the program is to protect the environment and save you money by encouraging energy efficient products, services, and practices. To that end, Masonite is proud to produce a wide variety of door and glass combinations that ensure our products can be used as part of an ENERGY STAR qualified assembled door system. Masonite doors and sidelites include a premium polyurethane foam core that insulates up to 5 times better than wood. Our triple pane decorative glass with coming creates an excellent insulator against the cold in the winter and the heat of summer. A properly installed ENERGY STAR qualified door system can save you money all year. Our NFRC certified door systems may qualify for the ENERGY STAR program.

Although other criteria exist for eligibility, including U-Factor and Solar Heat Gain Coefficients, use the charts below as a general guideline for which Masonite products may qualify.

For further information, see our website at: www.masonite.com.

Prices and specifications are subject to change without notice.

Pre-hung Units include - 4-9/16" Treated Primed Jambs, Primed Wood Brickmold Applied, Threshold and Zinc Dicromate Ball Bearing Hinges.
Sidepanels, listed below, come in either 12" or 14" widths.

Extruded Aluminum Cladding System for Entry Door Frames

*Single Doors *Double Doors

*Doors with 1 or 2 Sidelites

*Inswing or Outswing

*Accepts storm doors with no modifications necessary

*Cladding components can accommodate jamb widths from 3-1/2" to 12-1/2"

Four Stocking Colors

White, Sandstone, Bronze & Almond.

Special Order: Wineberry, Eggshell, Terratone, Green, Bahama Brown, Black & Arctic Silver.

Advantages over wood, plastic, vinyl or thin roll formed aluminum

- *No Painting
- *Easy to clean
- *Lasting appearance
- *No exposed fasteners
- *No unsightly caps or plugs
- *Will not rot/decay
- *Will not crack
- *Will not distort due to changing temperatures
- *Limited Lifetime Warranty

Optional Integral J-Mould used with the Contemporary Nosing offers the traditional Brickmould design and eliminates the use of an additional J-Channel. A one-piece Traditional is also available.

1-1/2" and 3" Mull Cover Components are used for sidelite and transom applications (not shown)

Piv-Loc extruded aluminum nailing fin aids in a secure and positive installation. Nailing fin folds flat against jamb for shipping & handling, then pivots open to 90° locked position for installation.

Frame Substrate or Jamb Material

Cladding Components can accommodate jamb widths from 3-1/2" to 12-1/2"

Window & Door Installation Anchor

The **TRU-LOC™** Clip was designed as a positive anchor for the installation of Doors and windows. There are times when shimming is difficult and occasionally impossible. If the product being installed is not securely anchored into the opening it can create numerous problems: poor energy efficiency due to air filtration, unsatisfactory operation due to not being plumb and square, damage to other materials due to water infiltration and ultimately a less than satisfied homeowner. Call backs cost a great deal of money and unhappy customers can create even more unforeseen costs to you and your business. Install it correctly the first time and save yourself time and money, not to mention the positive referrals from satisfied customers.

TRU-LOC™ may not be the answer to all installation situations, however when correctly installed it can greatly increase the ability for doors and windows to perform as they were designed to. FrontLine is continually striving to develop innovative new products that not only save time and money, our products are designed with consideration to all parties: Distributor, Dealer, Builder/Contractor and the Homeowner.

- **EFFECTIVE**
- **EASY TO USE**
- **ADJUSTABLE**
- **DURABLE**

Resisting the Forces of Nature™

TRU-LOC™

Window & Door Installation Anchor

Installation Instructions

The TRU-LOC™ Window & Door Installation Anchor consists of two parts. Part "A" "the bracket" and Part "B" "the angle." (Figure 1)

If the unit you are installing has Part "A" pre-applied please move on to STEP Two.

STEP ONE: Installation of Part "A" to the Jamb of the unit to be installed.

The Bracket is mounted vertically to outer face of frame using #8 x 5/8" pan head screws. It is very important that the Bracket is mounted squarely. The Bracket is to be mounted no less than 1" and no more than 2" from the interior edge of the jamb. (Figure 2)

STEP TWO: Install unit into opening using conventional methods, making sure that unit is plumb and square in the opening. Conventional shims should be used to create a consistent reveal and proper operation.

STEP THREE: Now that the unit is properly located within the opening, insert the angle into the slot created between the bracket and the jamb. (figure 3) The ribs on the face of both parts will interlock as the angle engages the bracket. Drive the stud or header. (Figure 4) Insert all angles into brackets and recheck door for plumb and square before using nails to secure angles to framing member. (figure 5) The TRU-LOC™ anchor is now installed and will effectively hold the unit in position increasing the longevity of proper operation and function.

TRU-LOC™ Anchors are designed to interlock very tightly, however if there is the need to remove the anchors after installation, the nails secure the angle to the framing member can be removed and the angle can be disengaged from the bracket by pulling it squarely from the bracket. The use of a small pry bar, claw hammer or pliers may offer some assistance in this removal.

Timeless Finishes by Badger

We'll Finish It... Exterior or Interior... Start to Finish, every aspect is performed "In-House" at Badger Corrugating. With unlimited matching capabilities and finishing options, we can offer paint glazing, stain glazing, artisan finishing and distressing. Perfect for remodel, fire restoration and general restoration projects. From windows, shutters, clad frames, aluminum siding and storm doors to steel sheets, XO board, soffit & fascia, virtually anything is possible.

Badger Corrugating offers a prefinishing option for Steel and Fiberglass doors and sidelites. All stock and special order doors and sidelites may be ordered prefinished. They will be spray painted or stained in our professional finishing booth, and then may be installed in a wood or clad jamb.

When placing an order for prefinished doors and sidelites, allow an additional two (2) week lead time. Custom colors may take one (1) week longer.

SCHLAGE LOCKSETS

A-Series Residential and Commercial. Cylindrical key-in-the-knob locks, the "A" series is ideal for heavy duty residential or medium duty commercial uses.

AL-Series Standard Duty Commercial: The AL-Series keyed lever lock utilizes the A-Series cylindrical chassis with stylish lever designs supported by heavy duty spring cages. This design provides strength and performance in commercial Grade 2 applications.

B-Series Security Deadbolt: B-Series deadbolt locks provide primary or auxiliary security locking. All deadbolts feature a 1" (25mm) throw with Schlage's exclusive door frame reinforcer to help prevent "kick-in" attack.

F-Series Residential: The F-Series economical residential Line consists of grip handles with 1" (25mm) throw deadbolts, key-in-the-knob entry locks and matching interior latchsets. They are mechanically long lasting and fill the need for moderate to low cost locks without sacrificing quality.

HOW TO ORDER:

To order Schlage products, descriptive data should be in the same sequence as shown.

Qty	Product	Outside		Inside		DR Thk	Door Hand				BS	Latch	Strike	Dim	Detail
		Des	Fin	Des	Fin		RH	LH	RR	LR

DOOR HANDING

All Schlage locks are reversible. However, the correct hand should be shown for all pin tumbler locks so that they may be assembled to assure keyholes are in the upright position.

Hand information is also necessary to ensure proper finish of latchbolt and strike for locks ordered that are to be installed on reverse bevel doors.

Follow the diagram to correctly determine the hand of the door.

SCHLAGE LOCKSETS

All interior locks, keyed deadbolt and entry locks are 2-3/8" to 2-3/4" with 3-way latch and standard strike.

Residential Electronics

Ships pre-programmed with random 6 digit programming code and 2 random 4 digit user codes. 19 user code capacity.

Fits standard 2 1/8" door prep. No other holes needed. Installs with just a screwdriver.

Mechanical key override which can be re-keyed to match existing house key.

Blue LED's illuminate the keypad on demand. Keypad numbers are imbedded into the silicone rubber, creating wear resistant buttons.

Warning code sounds after 4 incorrect codes entered and lock disables for 30 seconds.

9-volt alkaline battery included. 3 year average life. Low battery indicator.

Field reversible levers (where applicable). Locks available in both Plymouth and Camelot escutcheon designs.

PANOLOCK MULTIPOINT LOCKS

PANOLOCK™

THE NEW GENERATION OF
MULTI-POINT LOCKS

NO HARDWARE CONSTRAINTS.

Use your choice of most off-the-shelf hardware.

THREE TIMES STRONGER.

All the strength and security of a traditional multi-point locking system.

ENHANCED PERFORMANCE.

Two tapered locks enhance performance while reducing operation force.

SINGLE OPERATION SYSTEM.

Most multi-point locks require extra steps to lock the door. With PanoLock's innovative latch and deadbolt adapters, simply turn the thumbturn to lock.

FLEXIBILITY.

PanoLock can be used for both inswing and outswing.

FIBERGLASS COLUMNS

FIBERGLASS BUILDING PRODUCTS

AFCO's line of FIBERGLASS COLUMNS will enhance a home or business with not only style and elegance, but will also provide years of maintenance-free service. They are easy to install, and come with a limited lifetime warranty.

Pro-Cast columns are centrifugally cast from fiberglass-reinforced polymers, producing a beautiful tapered column, conforming to the Tuscan order of architecture. Two styles of bases are offered, along with five optional capitals. Shaft options include smooth, fluted, split for wrap-around applications and pilasters.

Pro-Lite square, pultruded fiberglass columns are available in five widths, ranging from 6" wide to 16" wide. These stylish columns feature Tuscan capitals, bases and astragals.

Dimensions			*Centered Load Limit (lbs.)
Base	Neck	Height	
10"	5-1/2"	5-1/2'	10,000
16"	9"	5'	15,000

*Load-bearing capacity is dependent on distributing the load evenly over bearing surfaces of the shaft. All installation information is of general nature; columns should be installed and secured (fastened) according to standard construction practices and in compliance with applicable local, state and federal building regulations. Note: 2nd story balconies should not be attached directly to the side of any column.
