LOW RIB – COMMERCIAL – RESIDENTIAL – STANDING SEAM Trims, Fasteners and Ag. Bldg. Accessories are available for all products. See Our On-Line Catalog for Pricing.

Badger is now stocking <u>PANEL-LOC PLUS™</u> in 14', 16' & 22' lengths in a limited number of colors. We also stock a number of the most popular trims and colors. (See the following pages.)

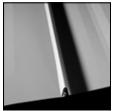

<u>PANEL-LOC</u>[™] is a low rib (5/8") panel that is best used for post frame barns and buildings, as well as residential roofing. PANEL-LOC[™] is available in 26 and 29 gauge steel.

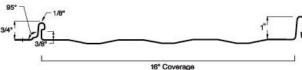

<u>PANEL-LOC PLUS</u> is a low rib (3/4") panel which provides durable performance with an added striation on top of the rib that gives it even more strength. PANEL-LOC PLUSTM gives agricultural and light commercial projects, as well as residential roofs, the protection of steel with an attractive appearance.

HORIZON-LOC[™] is a durable concealed fastener roof system with easy snap together installation. This architectural panel system uses minimal visible fasteners, giving your building a clean, attractive finish. The panel's easy snap-on ribs attach rapidly with no hand seaming, so installation is less expensive than traditional standing seam.

HERITAGE® SHINGLES: Algae Resistant

HERITAGE® shingles feature a double-layer fiberglass mat construction with a random-cut sawtooth design. The two layers of mat are coated with asphalt and then laminated together and surfaced with mineral granules. A self-sealing strip of asphalt helps provide wind resistance. Shadowtone granule blend adds extra richness and depth. Random-cut sawtooth design prevents unsightly zipper patterns. Extra-thick weather-resistant construction provides years of protection.

30 year limited warranty. U.L. Class A fire rated and U.L. wind related.

Classic Heritage® colors are time-honored favorites that create a traditional look.

Heritage® America's Natural Colors® add a contemporary flair with dramatic and vibrant hues.

Heritage[®] Woodgate[™] are designed with a wider cut that conveys a rugged yet refined wood-shake look. Unique color blend complements the expansive look and allows for more dramatic color distribution across the shingle. Enhanced shadow line further intensifies the rustic shake-like beauty.

EcoFill Wx blowing wool insulation is an unbonded, virgin fibrous glass blowing insulation having a high degree of post-consumer recycled content, designed for weatherizing and retrofitting existing housing. EcoFill Wx blowing wool insulation is used to dense-pack sidewalls using the drill and fill technique common in retrofitting homes or in home weatherization activities. EcoFill Wx blowing wool insulation is also excellent for doing open blows in attics. This means that only one product is needed to complete an insulation retrofit/weatherization project.

Starborn® Structural H23 screws are specifically designed to attach deck Ledgers to rim joists. They are fully tested and code compliant alternatives to traditional lag screws and through-bolts, with no pre-drilling required. Structural H23 screws feature a hex washer head for maximum drivability, a unique Tri-Forge™ point for reduced driving torque, and a high-adhesion exterior grade coating. Complete fastening instructions are available in the Deck Ledger to Rim Joist Technical Guide. Structural H23 screws can also be used in a variety of other code compliant wood-to-wood connections.

FANFOLD UNDERLAYMENT BOARD

SIDING UNDERLAYMENT

GreenGuard® Q-Series products consist of rigid, extruded polystyrene foam with tough polystyrene capsheets that are designed to withstand the rigors of jobsite handling. These products provide a smooth, level surface for new siding. The products are perforated to allow potentially harmful moisture vapor to escape so that it does not become trapped in the wall systems.

WOOD SPECIES AND FINISHES

WOOD SPECIES

STAIN GRADE MAPLE Stain Grade maple is smooth, even grained wood that may contain: narrow staves, sapwood, heartwood, and all other natural characteristics commonly found within this species.

PAINT GRADE MAPLE Paint Grade Maple is a smooth, even grained wood that may contain: narrow staves, sapwood, heartwood, and all other natural characteristics commonly found within this species. This grade is specifically intended for a painted finish. Skins and panels may be made from engineered wood products.

FINISHES

STAINS

Cabinets receive a coat of non wiping stain, one coat of self sealing conversion varnish and a top coat of conversion varnish.

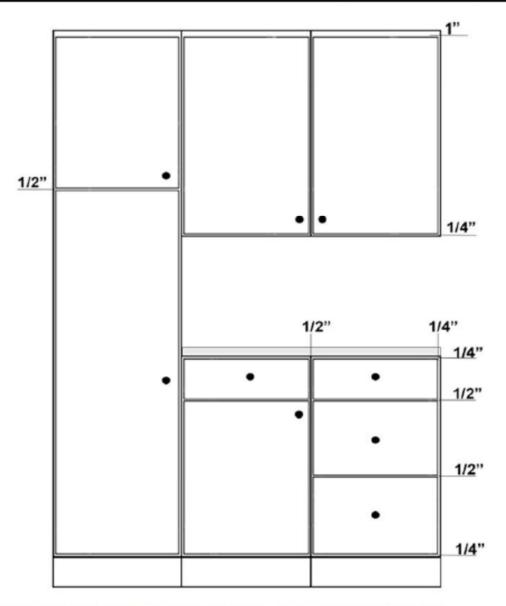

PAINTS - 8% UPCHARGE

On wood products, movement is typical due to changes in the climate conditions. This will cause the hairline cracks at the stiles, rails and joints that you will see in a painted finish. Panel shrinkage may also occur in the door panel of your cabinetry. Over time there may be a slight color change in this finish due to exposure to natural and artificial light. The color black also brings out the natural flaws in the wood that is hidden by other colors. These items listed above are natural occurrences in the wood and will not be considered a defect or reason for replacement by Koch Cabinets.

FINISHING PROCESS

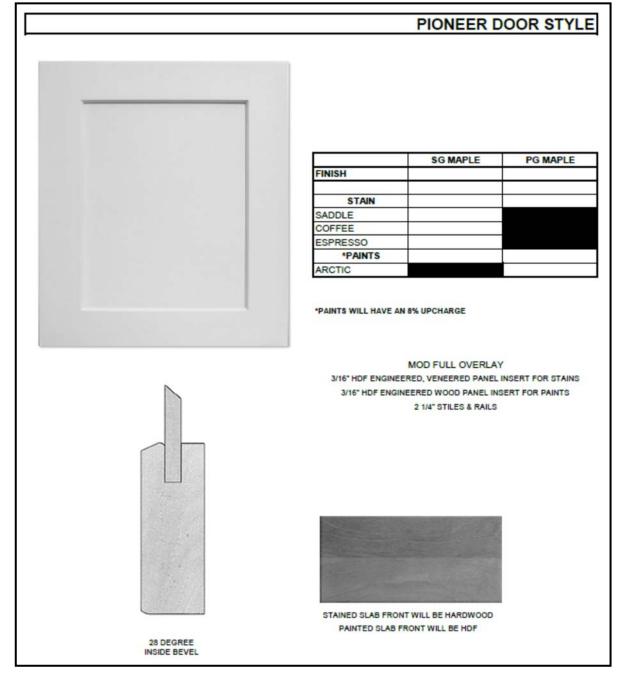

- 1. Doors and drawer fronts are sanded through a wide belt sander followed by an orbital sander.
- 2. They are hand sanded and inspected.
- 3. Stain is applied to both sides.
- Doors and fronts have a coat of self sealing conversion varnish applied and are oven cured one side at a time.
- 5. They are hand seal sanded and brushed clean of sealer dust.
- 6. They have a top coat of conversion varnish applied and are oven cured one side at a time.
