Copper Metallic*

CentralGuard® with Fluropon® remains vibrant, year after year.

Fluropon® 70% PVDF is the undisputed champion for color fade protection. Colors remain vibrant even when exposed to damaging UV rays and moist environments such as rain, dew, fog, acid rain, and chlorinated air.

CentralGuard is our specific combination of everything that goes into making the highest-quality metal panels. Choose CentralGuard with Fluropon® for the best fade protection and a lifetime paint warranty.

- Color remains vibrant longer than traditional SMP paint systems.
- Minimal fading.
- Best for extreme weather conditions.
- Chalk-resistant formula.

CentralGuard® with Fluropon® performs the best when compared to polyester or SMP paint systems.

Fade is measured in Hunter units. One Hunter unit denotes the smallest degree of color change visible to the naked eye. Lower numbers are better and mean less fading. Notice how CentralGuard with Fluropon fades much less than other paint systems and at a slower rate over time.

Explore our roofing visualizer.

Get started quickly with our preloaded photos, or upload your own photo. When you find the perfect combination of panel and color, you'll receive a summary of your project and have the option to connect with a local expert in your area to help you with your purchase and installation.
