

The 4-Point Performance Seal includes:

The difference is in the details

**Square edge door**

fits perfectly in the door frame.

Square edges are standard on all our fiberglass doors.

**Adaptive weatherstripping**

stops air and water in its tracks.

**Self-adjusting sill**

automatically adjusts when conditions change.

**Enhanced corner pads**

form a tight seal with the door.

**Masonite®**  
Performance  
Door System

# 64%

better at keeping air and water out than the leading competitor

## WEATHER RESISTANT

Premium fiberglass doors won't rot, warp or crack and are supported by rot-resistant frames that never wick water, swell or mold.

## ENERGY EFFICIENT

The Masonite® Performance Door System 4-Point Performance Seal keeps air and water out, so homeowners don't have to deal with leaks and drafts.

## INCREASES COMFORT

Front doors that keep the outside out also keep the inside in, making homes more comfortable whatever the weather.

# How does the Masonite® Performance Door System compare to the leading competitor?

	Masonite Performance Door System	The Leading Competitor's System
<b>DOOR</b>	comes with square edges that fit perfectly into the frame	has a proud edge design that create gaps where air and water leak in
<b>SILL</b>	automatically adjusts when conditions change	has exposed screws and has to be manually adjusted
<b>WEATHERSTRIPPING</b>	snaps back into shape when bent or twisted	has an open cell structure that loses its shape and absorbs water
<b>CORNER PADS</b>	designed to stop upward water pressure driven by wind	have no added channel to prevent upward water pressure
<b>FRAME</b>	is rot-resistant, so it never wicks water, swells or molds	has regular wood jambs that wick water, swell, mold, rot and require extra maintenance
<b>WATER TEST</b>	can withstand 8" of rainfall in one hour†	testing information unavailable
<b>WIND TEST</b>	can withstand 51.3 mph wind†	testing information unavailable
<b>WARRANTY</b>	10-Year Limited Full Replacement Warranty* that covers labor costs to re-install	Lifetime Warranty with a maximum of \$2,500 for installation labor reimbursement

†Test: ASTM E331 Water Penetration of Exterior Doors by Uniform Static Air Pressure Difference. Tests performed by Architectural Testing, Inc. and Intertek company.

\*Warranty covers labor cost to re-install. Door system and its components must be properly assembled, installed and maintained. See warranty for additional details.
